Towards Eliminating the Wedge:

a Conversation on Prison Justice and Gender-based Violence

**LET'S
TALK!**

This is the beginning of a dialogue for women, trans, genderqueer, and gender nonconforming individuals (no cis-men, please) about resolving the differences and contradictions between a feminist struggle for safety and the struggle to end mass incarceration.

The focus of the discussion, which has long been a source of difficulty for those organizing to end gender-based violence and the violence of the criminal justice system, will be:

- *solutions that make demands on the system
- *solutions based in our community
- *solutions that both create safety from gender violence and end mass incarceration
